

Reel-to-Real: Fact and Fiction in Films about Speech and Hearing

A series of events sponsored by USF's Department of Communication Sciences & Disorders and the Museum of Science and Industry
Open to the general public, professionals, USF students and faculty

Regarding Henry

A film about brain injury (PG-13)

followed by a **panel** discussion of **brain injury experts**

Thursday, November 10, 2011

The day before Veteran's Day

6:00 p.m. to 9:00 p.m.

at the
Museum of Science and Industry
Science Works Theater

What would you do if, suddenly, you woke up in a hospital room unable to walk, talk, read, write, or remember? This is what happened to Henry Turner, played by *Harrison Ford* in the movie *Regarding Henry* (1991, Mike Nichols). It's the kind of thing that has happened to over 5.3 million people in the United States who are living with the effects of brain injury.

Henry Turner is a successful attorney who is shot in the head when he stumbles on a robbery in a convenience store. The film addresses the challenges faced by his wife (played by *Annette Bening*), children and friends as they learn to relate to the person Henry has become after his brain injury.

A panel of experts in brain injury will discuss current advances and issues in traumatic brain injury after the film presentation.

Michael Hoffmann, MD
Professor of Neurology (UCF)
Director Cognitive Neurology and Stroke Programs
James A Haley Veterans Administration Hospital

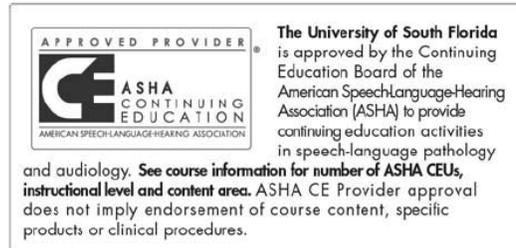

Lisa Stanley, M.A., CCC-SLP
Speech-Language Pathologist
Tampa General Hospital

Dale Santella, BSW, CBIS
Family Services Manager
Brain Injury Association of Florida, Inc.

Jackie Hinckley, Ph.D., CCC-SLP
(moderator)
Associate Professor Emeritus
Communication Sciences & Disorders
University of South Florida

Events, programs, and facilities of the University of South Florida are available to all without regard to race, color, marital status, gender, sexual orientation, religion, national origin, disability, age, Vietnam or disabled veteran status, as provided by law and in accordance with the university's respect for personal dignity. USF is an Equal Opportunity/Equal Access Institution. For disability accommodations, contact Jackie Hinckley at jhinckle@usf.edu a minimum of at least five (5) working days in advance.

SPEECH-LANGUAGE PATHOLOGISTS – Earn ASHA CEUs by attending this event. Bring your family and friends, and consider inviting your clients or a local support group. To earn ASHA CEUs, you will need to attend the entire three hour event.

This program is offered for 0.3 CEUs (professional area, intermediate level). ASHA CE Provider approval does not imply endorsement of course content, specific products, or clinical procedures.

Learning Outcomes:

As a result of this activity, participants will be able to:

1. identify one community resource available for individuals living with traumatic brain injury
2. describe one common myth or misunderstanding about brain injury that may be perpetrated by popular media
3. list one evidence-supported treatment for speech, language, and cognitive issues subsequent to brain injury.
